«ALEKSANDRIT» LLC

«Aleksandrit» LLC performs its activity under the trademark «KurganLes». Main sphere of the company is manufacture and supply of timber materials in all regions of Russia and countries of Asia and also rendering of help in execution of export documentation (Phytosanitary Certificate, customs declaration and etc.).
Company assets make a share in the timberland holding with area 40 000 hectares, and also own dead-end sidings and freight motor transport.
The second sphere of «KurganLes» Company is deep processing of wood materials such as lining board, floor board, furniture board, laminated sawn timber, cylinder timber.
The third sphere of the company is manufacture and building of objects from cylinder timber and laminated sawn timber (houses, cottages, bath-houses, hotels, cafes and etc.).

АльянсЛес
Торгово-производственная компания

IE A.V. ASTAFIEV

«ALYANSLES» group of companies has been performing its activity in the sphere of wood logging and sawing with further distribution since 2009.
«ALYANSLES» group of companies manufactures different types of timber: sawn timber, edged and unedged board, lining board, flooring strip, joiner's board, cylinder timber, building timber, different joinery products, and also prefabricated housings (ready products from pinewood for individual housing construction) and etc.
Company assets make production bases and fleet of trucks.
Productive capacities of the company according to results of 2020 are 55 200 m^3 of timber materials.
Products quality is in compliance with GOST.
Manufactured products are in demand by both internal and external markets of timber materials. Export is carried out in the following countries: Kazakhstan, Uzbekistan, Kirgizia, Azerbaijan, Afghanistan.

«GLYADANSKIY LESHOZ» JSC

«Glyadanskiy Leshoz» Joint-Stock Company was founded in 1999.

Main spheres of the company activity area are timber harvesting, primary wood processing, regeneration activity.

Range of manufactured products of «Glyadanskiy Leshoz» JSC is the following:

- pine edged timber;
- pine unedged timber;
- cylinder timber.

At present the company has in its holding areas of forest resources for logging, processing of wood with compulsory works in forest reproduction, security and protection of forest with area 94 401 hectares, situated in three municipal areas of Kurgan region.

For forest reproduction the company has its own forest nursery with area 13,7 hectares for growing of planting material.

«WOOD PROCESSING PLANT «KOSOBRODSK» LLC

«Wood processing plant «Kosobrodsk» LLC was founded in 2007.
Main sphere of the plant is logging, forestry works with further added-value wood processing.
The plant consists from production departments: shops, sections, economic bodies of management and organisations for services provision to the enterprise employees.
Main production department includes: wood processing shop which consists from four sections: section of timber drying, section of blank parts, section of joinery products assembly, section of joinery products finishing; shop of timber sawing; shop of logging operations.
Auxiliary production department consists from repair and mechanical shop, which includes power engineering department; transport department; handling shop.
List of manufactured products:

- window and doorframes from glued laminated timber;
- panelled door units from solid wood;
- bathing door units from whole wood;
- window and balcony wooden units with double sheet glazing;
- floor board;
- plinth, casing moulding;
- euro-batten;
- siding board;
- wooden houses from cylinder timber;
- edged and unedged timber materials.

The manufactured products are in demand on both internal and external markets of timber materials. Export is performed in the following countries: Kazakhstan, Uzbekistan, Azerbaijan and Afghanistan.

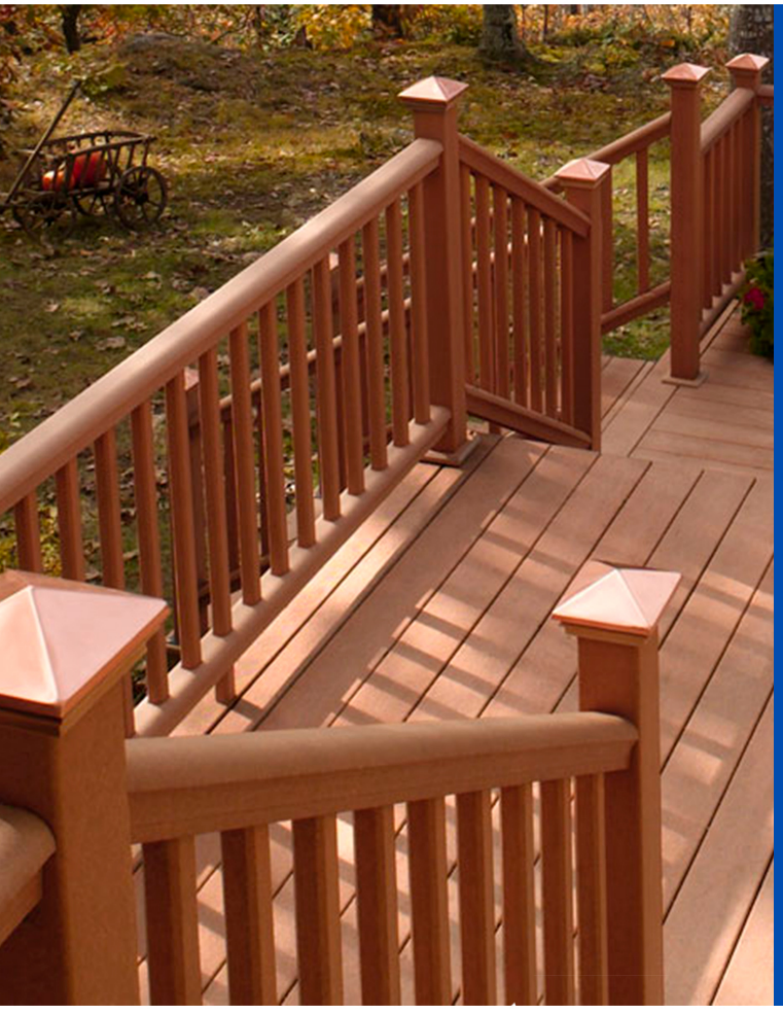
TRADING HOUSE «DPK» LLC



Wood and polymeric combine (Trading house «DPK» LLC) is a specialized enterprise dealing with full cycle of wood processing and secondary recycling of polymers. On the basis of these two spheres a production department for manufacture of products from wood and polymeric composite was organized in 2010.

Wood and polymeric compound is a modern material consisting from polymers and wooden filler. It combines the best qualities of wood and at the same time it does not have its shortcomings (combustibility, temperature fluctuations, fungus, decay, surface defects and etc.).

The company manufactures decking from wood and polymer compound (board for floor – street floor pavement). Decking is used as garden tiling and also for laying of playgrounds, parking areas, verandas, ferries, decks. Hence there are names – decking, decking plank.

The second field of Wood and Polymeric combine is secondary recycling of polymers. The final product is secondary granulated polypropylene which does not require developed conditions of storage, keeping its qualities during long time.

Products manufactured by Trading house «DPK» LLC have passed tests and they are allowed for application that is confirmed by certificates and conclusions.

«PRODUCTION FORESTRY ASSOCIATION «IMPULS» LLC

Production forestry association «Impuls» was founded in 1991.

Spheres of the company activity are:

- harvesting of wood. Basic species of wood are: pine, birch, aspen;
- manufacture and wholesale and retail distribution of square edged timber;
- manufacture and wholesale and retail distribution of trim. Basic products are: euro-batten from pine, imitation log siding, floor board;
- manufacture and wholesale and retail distribution of furniture from pine solid wood.

At present more than 300 people work on the enterprise.

Modern machines and equipment for wood processing are used on the enterprise, such as wood-sawing line, dryers, automated line of union and optimization, line for manufacture of tare boards and processing of small-diameter timber and wood residuals in industrial chips, all-purpose harvesting and logging equipment (Harvester).

Supply is performed by automobile and railway transport.

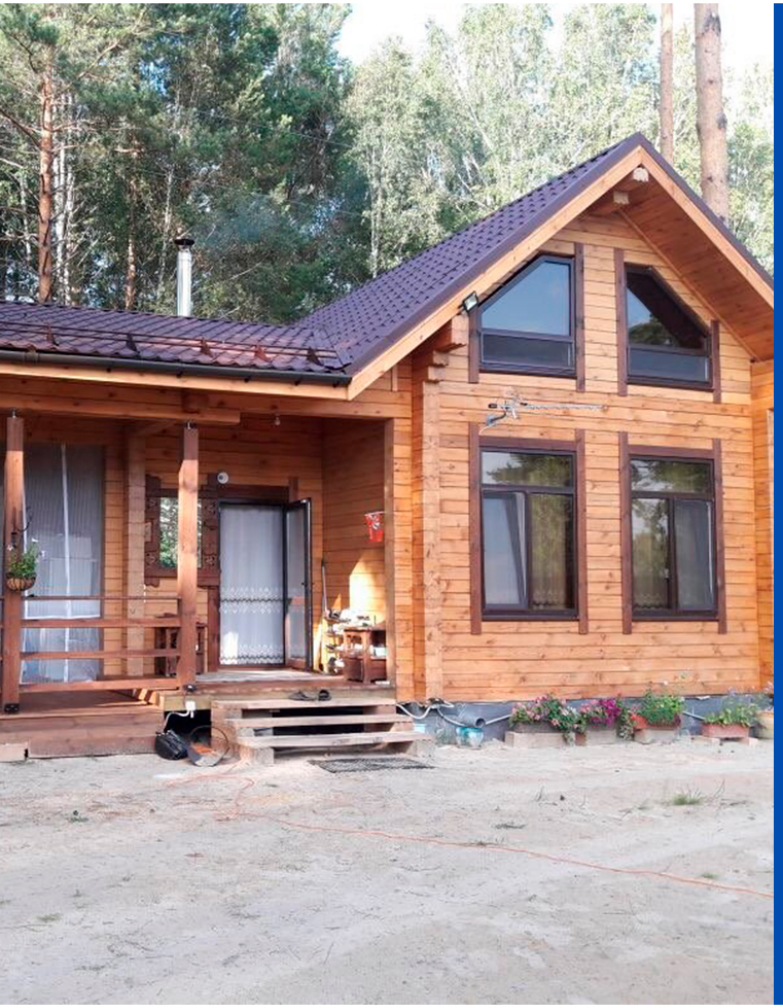
«KARGAPOLSK LESPROMHOZ» LLC



«Kargapolsk Lespromhoz» LLC has been processing wood since 1994. During 25 years of work the company has achieved high positions on the market for manufacture and sale of products from wood.

«Kargapolsk Lespromhoz» LLC is a tenant of a forest plot with area more than 12 thous. of hectares. Logging and further supply of wood on the production facilities is performed, where further sorting and production of sawn goods are carried out.

Range of the company:

- linear articles (euro-batten, match, cornice boards, decking);
- laminated lumber;
- cylinder timber

The second specialization field of «Kargapolsk Lespromhoz» LLC is design and production of houses. More than 200 projects have been developed and more than 600 objects have been built by company over the years.

The company cooperates with regions of Russia and CIS countries.

«LES-KOMPLEKT» LLC

Production company «Plant of wooden house building» («LES-KOMPLEKT» LLC) was founded in 2000 as a manufacturer of houses from cylinder timber and laminated sawn timber including products of wood processing.

Raw material resources base and shop for house building are located on the plant territory.

Modern production department can manufacture up to 1000 m^3 of ready products per month.

Advantages of «LES-KOMPLEKT» Company:

- development of standard and individual designs of houses;
- manufacture of base;
- manufacture of building materials: log constructions from cylinder timber and laminated sawn timber, timber materials (lining, floor board and etc.);
- supply and mounting of log constructions;
- building of “key-ready” wooden houses.

Supply of products is performed through the whole Ural and also to KhMAD, YNAO and countries of the near abroad.

«PROFIL» LLC

Enterprise «Profil» LLC has been at the market of forest products industry since 2006.

Spheres of the company activity:

- forestry and logging;
- manufacture of timber materials;
- manufacture of wooden building constructions and log constructions including from cylinder timber;
- manufacture of joinery products;
- distribution of timber in the round and timber materials.

Assets of the company are areas of woodland holdings – 88017 hectares, own forest nursery for growing of planting material with area 8 hectares, own automobile transport for products transportation.

The company is constantly developing from year to year, gradually increasing its productive capacities. At present «Profil» LLC has reached position of a leader in manufacture of timber materials in the region.

Supplies are performed in any region of RF and also in countries of near abroad.

Products are certified.

«URAL WOOD» LLC

«URAL WOOD» LLC enters the group of companies and it has been carrying out logging and wood processing activity since 2005 and it is considered a successful industrial enterprise.

«URAL WOOD» Company proved itself as a reliable partner among commercial companies and state bodies.

«URAL WOOD» LLC has several subsidiary enterprises which deal with provision of production cycle and raw material (harvesting operations).

Range of the company: sawn timber, edged and unedged board, lining board, floor board, laminated veneer lumber, cylinder timber, small bars, different joinery products.

Assets of the company are timberland holdings, production bases and fleet of trucks.

Products of «URAL WOOD» LLC are demanded and in request on both markets of timber materials, internal and external quality of products is detected by inner and international standards, products are manufactured in compliance with GOST.

Orientation for export which is up to 70% in general volume of sales has a great influence in relations with customers.

«EXPOLES» LLC

«ExpoLes» LLC is one of the leading companies for manufacture and supply of sawn timber with natural moisture (pine), in compliance with GOST.

Range of the company:

- sawn timber;
- edged board;
- unedged board;
- forest thinner.

Assets of «ExpoLes» LLC has its own railway sidings, that allow the company to carry out services for sawn timber shipping to the final consumer and also shipping facilities with registered warehouses of temporary storage.

«ExpoLes» Company performs supplies in regions of Russia and also it has large working experience with Asia countries such as Azerbaijan, Kyrgyzstan, Turkmenistan, Uzbekistan, Tadzhikistan, Afghanistan.

«Yurgamyshsk lespromkhoz» OJSC, having in long-term holding a forest area with volume of timber logging 37000 m^3, performs logging operations and wood processing.

КУРГАНСКИЙ АРМАТУРНЫЙ ЗАВОД

«KURGAN PLANT OF FITTINGS» LLC

«Kurgan plant of fittings» LLC specializes on manufacture of shutoff valves for enterprises of oil, gas, chemical industries.
The plant has experience of supply to big holdings of oil, chemical and other spheres of industry.
The plant manufactures products from carbon, alloy, stainless steel and also it has experience in manufacture of valves from other steels and alloys of Russian and foreign manufacture.
More than 2000 of different equipment units are engaged in manufacturing cycle, including own tool shop, galvanic manufacture, central measuring and central plant laboratory for incoming control carrying out at all stages of manufacturing process: from quality control of purchasing raw materials and materials till carrying of ready products tests.
Productive capacity of the plant is 5 000 tonnes per year.
Products are certified in compliance with requirements of GOST ISO.
Products quality is guaranteed by control.

«ARMTEHSTROY» LLC («TERRITORY 45»LLC)

«Armtehstroy» LLC («Territory 45» LLC) is an enterprise which has been specializing in manufacture of pipeline valves for needs of oil and gas industry in the sphere of refining and extraction for more than 15 years.

Now products of «Armtehstroy» LLC are in stable demand in oil and gas extraction and petroleum refining industry sectors.

Geography of supplies covers all regions of Russia and also near-abroad countries such as Kazakhstan and Azerbaijan.

Quality management system, in respect to manufacture of shut-off valves, is in compliance with requirements of ISO 9001-2015 standard.

The company has its own manufacturing areas – 2900 m² and it has manufactured more than 350 000 items of products.

Manufacturing range:

- gate valves;
- shut-off valves;
- non-return valves and check valves;
- valves for technological lines;
- flanges and component parts.

KMZ BIT

IE A.V. CHUNIN

«Kurgan Mechanical Engineering plant of Drilling Tools» Company («KMZ BIT») is one of famous manufacturers of drilling tools in Russia which has been offering its services since 2007.
Products of the company have a certificate of ISO 9001 standard and differ by their high quality.
«KMZ BIT» performs full production cycle and realizes the following tasks:

- design;
- tests performance;
- certification of products;
- development of new products and their serial output.

The company specializes on manufacture of the following products:

- winged bits (more than 80 types of instrument);
- bits PDC;
- drill bars;
- drilling tools for HDD;
- rotary swivels for small-size drilling rigs and crane-drilling machines.

Main categories of «KMZ BIT» clients are:

- exploration crews;
- organizations, providing services of under water drilling and also building services;
- enterprises for full supply maintenance of drilling technicians.

Confirmation of «KMZ BIT» equipment liquidity is its supply to such countries as: the USA, Canada, France, Belgium, Japan, Romania, Senegal, Ghana.

«OFF-THE-ROAD VEHICLES «BURLAK» LLC

«Off-the-road vehicles «Burlak» LLC was founded in 2017.
The company manufactures snow and swamp-going vehicles on superballoons and also specialized trailer units for them. «Burlak» is a multifunctional running in all conditions chassis. Installation of different modules and equipment is possible on its basis. Now there are 13 certified modifications of the off-the-road vehicle and more than 60 modifications of trailer unit to it.
Area of the plant is 2797.7 m².
At present productive capacity is 6 off-the-road vehicles per month.
Own design bureau develops new models and modifications and also performs individual orders.
Off-the-roads vehicles of the company passed preliminary operation in big resource-extracting companies, military and security services and Ministry of Emergency Situations of Russia. At present off-the-road vehicles operate on Chukotka, Yamal, Taimyr, in Yakutia and Antarctica.

«SHADRINSK ELECTRODE PLANT» LLC

«Shadrinsk Electrode Plant» LLC conducts its history since the year 1958. Today the plant is one of the leading Russian manufacturers, supplying market with more than 100 brands of welding electrodes.

The company's clients are enterprises of general civil construction, oil and gas construction, shipbuilding, mechanical engineering, bridge construction and enterprises of many other industries.

Company benefits:

- High quality level. Electrodes of the main nomenclature of brands are certified in GOST R system and by NAKS, have Approval of the Russian River Register;
- Large assortment of welding electrodes. Possibility of manufacturing electrodes, according to customer requirements;
- Customer support. Providing free samples of products and catalogs with delivery at the expense of the plant. Free training for employees of trading companies. Own authorized service center to repair equipment;
- Domestic chemical-analytical laboratory, performing quality control of incoming materials and manufactured products;
- Quality package. The final packing of the electrodes is a shrink film, which gives tightness and ensures long shelf life. The wire is also Packed in a hermetic film and a quality pack of corrugated cardboard.

«DELTA TECHNOLOGIYA» LLC

Production enterprise «Delta Technologiya» LLC was founded in 1996.
The company specializes in the following spheres:

- mechanical metal treatment;
- tools manufacture;
- moulds manufacture;
- foundry-pattern equipment.

The company has a complex of machining equipment in amount more than 80 units, it allows to manufacture all types of products mechanical treatment from metal and other materials and moulds. Numerical-controlled machines (CNC) are used in work, that allows to manufacture moulds with out-line of any level of complexity.
Development of design and technological documentation is performed by highly qualified specialists with application of licensed systems.
Russian and foreign companies are partners of «Delta Technologiya» LLC.

«KURGAN PLANT OF MECHANICAL PROCESSING» LLC

«Kurgan plant of mechanical processing» LLC specializes in manufacture of hand drives for operation of pipeline valves.
Output range:

- reduction gearboxes for pipeline valves, intended for installation on a ball valve, closing element and other non-full swing stop or control pipeline valves;
- reduction gearboxes for pipeline valves, intended for control of pipeline valves with rising and non-rising stem;
- double-speed planetary reduction gearboxes, intended for installation on a ball valve, closing element and other non-full swing stop or control pipeline valves.

All reduction gearboxes are certified and protected by patents.
Products of the plant are supplied to a number of big Russian enterprises of valve industry.
Productive capacities allow to perform complete production cycle of the provided products.
The enterprise is equipped with multifunctional software and semi-automatic metal-cutting equipment. There are more than 20 units of equipment - machines for edge cutting and final treatment of gear-wheels.

ООО «Завод механический»

«MECHANICAL PLANT» LLC

«Mechanical plant» LLC is a small mechanical engineering plant, equipped with necessary technological equipment, providing full production cycle for manufacture of component parts and constructions for different fields of industry.

The plant consists from 3 specialized shops with production area more than 10 thousand square metres and more than 400 units of technological equipment.

«Mechanical plant» LLC manufactures:

- flywheels (steering wheels) for pipelined valves with sizes from 90 mm to 800 mm;
- components for special equipment (amphibian caterpillar trucks, tractors, bulldozers, loaders and etc.);
- attachment equipment for multipurpose utility-building machine and other municipal equipment;
- different types of steel wire ropes with diameter from 3.6 mm to 36 mm;
- products according to the provided drawings.

The second sphere of the plant is rendering of services in mechanical processing (turning, milling, drilling and other works), cold pressing, pipe-bending welding works, plasma-cutting of metal and etc.

One more sphere of «Mechanical plant» LLC is development, manufacture and mounting of children's play, sport and park equipment.

«ZAURALPROMARMATURA+» LLC

«ZauralPromArmatura+» LLC has been performing details in manufacture and realization of pipeline valves.
Products of the company are intended for control and regulation of different mediums flows: liquid, gaseous and gas-liquid.
«ZauralPromArmatura +» is a manufacture of closed cycle. Several shops work on the enterprise: blank production, test, assembly.
Range of the manufactured products:

- shut-off valves;
- return valves;
- needle valves;
- media separators;
- flanges and component parts

The above-mentioned pipeline valves are manufactured with different diameters, and they are intended for operation in different temperature conditions and have different types of connections to pipelines.
Products of «ZauralPromArmatura+» pass through obligatory control of QCD, passports and certificates with indication of chemical composition and physical properties of the material are provided.
All products of the company are certified.

«PLANT OF ROAD-BUILDING MACHINERY «REGION 45» LLC

Plant of road-building machinery «Region 45» is a manufacturer and supplier of special-purpose machines for building, road and public utility works, which holds leading market positions among manufacturers of road and utility equipment.

Range of the company:

- multipurpose road maintenance vehicles for summer and winter traffic roads main tenance and attachable equipment to them;
- bitumen spraying machines for distribution of binding materials of different type (bitumen, bitumen emulsion, bitumen impregnations);
- spare parts for Multipurpose road maintenance vehicle;
- work automation systems for utility special-purpose machines of different application.

Clients of the company are individuals, road, industrial and building companies.

The plant has its own laboratory and design bureau.

All marketable equipment and spare parts passed certification and they are in compliance with all requirements of quality.

Plant of road-building machinery «Region 45» performs supplies all over the territory of Russia and in CIS countries.

Зауральский
машиностроительный завод

«ZAURALSKY MECHANICAL ENGINEERING PLANT» LLC

«Zauralsky mechanical engineering plant» LLC - is a machinery manufacturing plant, founded in 2003 on the basis of Demonstration plant of Kurgan Experimental Design and technological Institute of Automobile industry.

Field of the plant concern is:

- production of mobile drilling rigs intended for wells drilling by a rotary system with auger-type cleaning, mounted on the basis of snow and swamp-going vehicle chassis and on the basis of tractor;
- serial production of amphibious tracked snow and swamp-going vehicles of different complete sets;
- production of forest-fire equipment;
- production of augers, drilling heads, tips and other drilling tools.

«Zauralsky mechanical engineering plant» LLC has more than 200 units of production equipment, located on the area in 13000 m².

Zauralsky mechanical engineering plant is an enterprise of closed technological cycle, beginning from prefabrication and ending with painting of ready products.

Amount of the plant staff is 300 people. All products come through strict quality control and have certificates of conformance.

«ITM «SPETSMACHINA» LLC

«ITM «Spetsmachina» LLC is a machine-building enterprise, which manufactures quality municipal equipment, which has passed all tests and in compliance with modern consumer demands and safety requirements.

Types of manufactured municipal equipment:

- municipal equipment for cleaning and washing of streets;
- municipal equipment for pavements cleaning;
- sanitation cars;
- road-building machinery;
- bitumen spraying machines;
- bitumen distributors and etc.

The plant has modern manufacturing buildings, big equipment stock and highly-qualified staff.

Productive capacities of the plant are more than 40 types of technical equipment per month.

Advantages of «ITM «Spetsmachina» LLC:

- full guarantee for each manufactured machine;
- more than 400 models and modifications of different road-building machinery and municipal equipment were manufactured;
- 50 countries for special equipment supplies;
- continuous availability of machines models in the range.

«KURGAN PLANT OF POWER TRANSFORMERS» LLC

«KURGAN PLANT OF POWER TRANSFORMERS» LLC has been working at the market of electrotechnical equipment for more than 20 years, and it mainly specializes in manufacture of power oil-immersed, dry-type and furnace transformers, substations of different modifications and delivery sets, and also panel equipment.

Kurgan plant of power transformers manufactures transformers with voltage rating 10000 kV, 6000 kV, 35000 kV, 110000 kV.

Manufacturing areas of the plant have:

- shop for manufacture of transformers coil wraps;
- shop for manufacture of transformers substations and panel equipment;
- oil facilities;
- modern electrotechnical laboratory;
- shop for manufacture of power transformers.

Safety and quality control of manufactured products are confirmed by certificates of conformance.

Supplies are performed all over the territory of Russia and CIS countries.

«KURGAN PLANT OF WIRING GOODS» JSC

«Kurgan Plant Of Wiring Goods» JSC is one of the largest enterprises in the domestic market of wiring goods manufacturers. The wide range of products offered includes wiring and low-voltage equipment with a variety of coatings and climatic versions.

The plant provides its products to installation companies, constructing industrial facilities in our country and abroad.

The enterprise offers a wide range of cable management systems and wiring equipment:

- perforated installation trays, supporting trays, boxes for cables and wires installation;
- prefabricated cable structures: racks, shelves;
- wiring profiles and strips, structural channels;
- horn brackets for subway and tunnel construction systems;
- products for performing trolley lines of overhead cranes;
- boxes for electrical wiring and cable lines.

The enterprise has its own lines of hot dipped galvanizing, electroplating, and powder coating of products.

The products were tested and voluntarily certified under the GOST R system. The quality management system meets the international requirements of ISO.

КМЗКО
КУРГАНСКИЙ МАШИНОСТРОИТЕЛЬНЫЙ ЗАВОД КОНВЕЙЕРНОГО ОБОРУДОВАНИЯ

«KURGAN MECHANICAL-ENGINEERING PLANT OF CONVEYOR EQUIPMENT» JSC

«Kurgan mechanical-engineering plant of conveyor equipment» JSC is a modern Russian enterprise for design and manufacture of conveyor equipment for different sectors of industry.
The plant started its work in 1954. At present the total area of the enterprise is 28000 m², including production facilities of more than 13000 m².
The plant has its own design bureau. Productive capacities allow to manufacture more than 3500 conveyors per year. The products are certified.
Major customers of the output products are companies of building industry and fuel-energy complex, enterprises of ore and non-metal mining, agro-industrial complexes and engineering centres.
Manufactured equipment:

- belt conveyors;
- screw conveyors;
- chain conveyors;
- high-angle conveyors;
- bucket elevators;
- feeding mechanisms;
- stackers NOVOSTACK;
- bucket chains;
- assembly units and component parts.

At present «KMEPCE» JSC is one of the biggest in the country suppliers and manufacturers of belt and drag conveyors, spare and component parts for them.

«KURGANMASHENGINEERING» LLC

«Kurganmashengineering» LLC was founded in 2006 and it specializes in development and serial manufacture of equipment for overhaul repair of gas and oil pipes with any diameter, performs supply of machines and commissioning operations.

Services of the company:

- design and manufacture of equipment for pipelines re-insulation: machines, intended for full cycle of pipelines repair;
- design and manufacture of non-standard equipment: testing units, metal constructions, boxes and etc.;
- design and mounting of electrical equipment.

All products of «Kurganmashengineering» LLC are protected by RF patents and have permissions of Federal Service for Ecological, Technological and Atomic Supervision (Rostekhnadzor) and they are included in «List of equipment allowed for application on objects of «Gasprom» OJSC for performance of works connected with repair of gas pipe lines insulation coatings».

«KP-AUTO» LLC

«Kurgan trailers» Company has been a manufacturing enterprise for output of car trailers since 2002.
About 2000 car trailers leave assembling shop of the enterprise every month.
Production volumes are constantly increasing.
Over 300 people work in the company, 80% from them – in manufacturing departments
Structure of the enterprise is: shop for manufacture preparation, section of thermal treatment, shop of polymer coatings, assembling shop, sewing section, transport section, Chief Engineer's service, sales department, department of material and technical supply, accounting department.
For the purposes of the manufactured products quality improvement, modern high-performance equipment has been run into operation, automated section of sheet metal plasma cutting is available, numerically controlled machine tools are used for mechanical processing.
Products of «Kurgan trailers» Company are widely represented in many cities of Russia, Kazakhstan and Belarus.

SCIENTIFIC DEVELOPMENT AND PRODUCTION CENTRE “KURGAN PLANT OF SPECIAL VEHICLES” CJSC

Scientific development and production centre «Kurgan Plant of Special Vehicles» Closed Joint-Stock Company was founded in 2011.

The company manufactures different special vehicles for maintenance and cleaning of road surfaces, attachment equipment for utility machinery, special vehicles for Ministry for Civil Defence, Emergencies and Disaster Response and Ministry of Internal Affairs, mobile robotized fire-fighting systems, wide range of hydraulic guns with manual and remote control and also in explosion-proof design.

Due to own productive capacities, scientific development and production centre «Kurgan Plant of Special Vehicles» CJSC performs full cycle of equipment manufacture in shops of its enterprise.

Advantages of the company:

- area of the plant is 7 000 m²;
- the plant has three shops: blank production, assembling, mechanical;
- own design bureau;
- own department of output products technical control.

Metal structures of different purpose are manufactured by the enterprise according to drawings of the customer or with development of drawing and technical documentation. Hydraulic cylinders, consumables, component parts for bitumen spraying machines and public utility road machines are always available at stock.

«PRODUCTION ASSOCIATION «KURTAMYSH MECHANICAL PLANT» LLC

«Production association «Kurtamysh mechanical plant» LLC performs manufacturing of heat-transfer equipment and heaters for heat and power sphere.
The plant is equipped with own areas with warehouses. 2 manufacturing shops with total area about 3500 m² work there. Also the plant has its own motor car park.
Modern foundry equipment is used by the plant for products manufacture.
Workshops are equipped with turning and welding machines. Technological department performs control at each stage of production.
Range of the output products:

- steam-water heaters;
- water-to-water heaters;
- boilers;
- fuel heaters;
- low-pressure heaters;
- vapour coolers;
- piping systems.

Products of the plant are realized all over the territory of Russia, and also they are exported in such countries as: Ukraine, Kazakhstan, Estonia, Belarus, Mongolia, and Uzbekistan.

МАШНЕФТЕГАЗ
КУРГАН

«MASHNEFTGAS» LLC

Basic sphere of «MashNeftGas» LLC is development and manufacture of pipeline valves, particularly shutoff and regulating and shutoff valves, including oil-pumping stations.

At present the enterprise has developed, mastered and put into manufacture the following products:

- taper-seat valves, intended for use as locking units on pipelines for liquid and gaseous working mediums;
- straightway stop valves, intended for use as locking units on pipelines for water, valour, hydrocarbons, their mixes and also other working mediums;
- return valves intended for automatic prevention of working medium reverse flow on pipelines for water, hydrocarbons, their mixes;
- oil-pumping stations, intended for entering into delivery set of lubrication system of high pressure pumping units for provision of quality and long-term work of bearings of hydraulic and electrical parts of basic force pumps used on installations of seam pressure increase;
- ball valves, intended for installation as stop valves on a linear part of pipelines and equipment of oil and gas industry;
- reduction gearboxes, intended for movement of locking and regulating element of pipeline valves, and also for creation of forcing for provision of required leak-tightness in shutoff valve.

All manufactured by «MashNeftGas» products are certified.

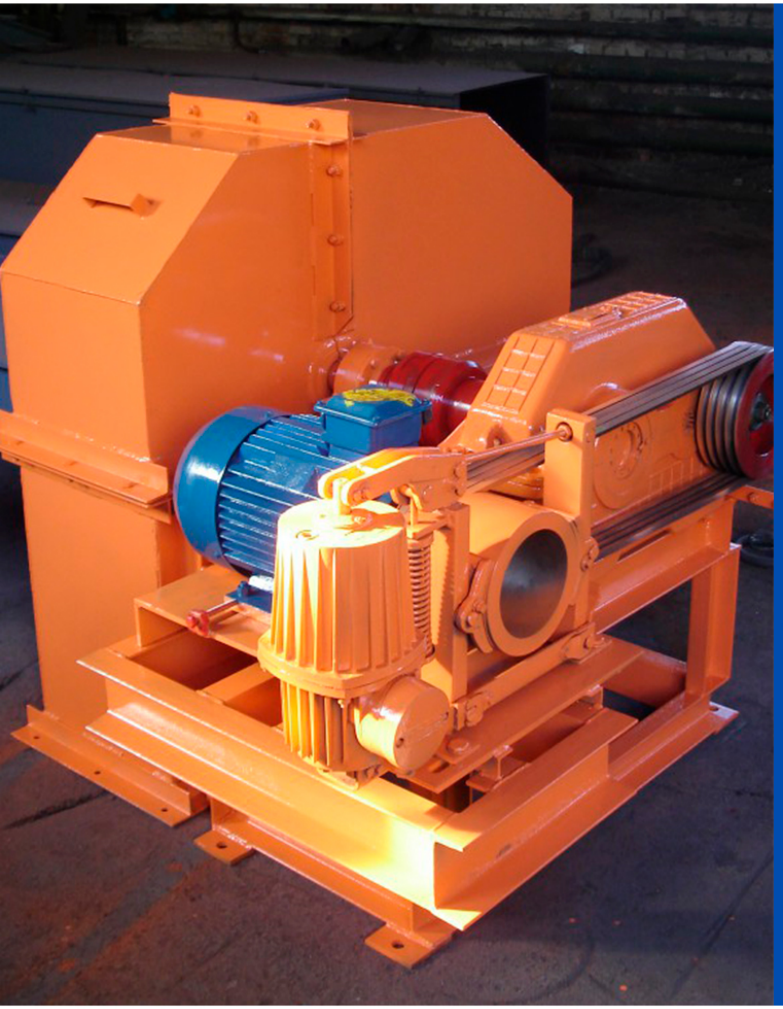
«PLANT MELMASH» CJSC



«Plant Melmash» CJSC is one of the leading enterprises for design and manufacture of equipment for different spheres of industry.
Main activity type of the enterprise is manufacture and supply on the market of belt, screw, drag, belt-chain conveyors, chain and belt-bucket elevators, grain bucket conveyors, auger and belt feeders, spare parts for conveyors, conveyor assembly units, different metal constructions and other equipment.
The enterprise manufactures fully certified in compliance with Russian standards equipment for mining and processing combined works, coal stripe mines, elevators, feed-milling establishments, mills, poultry factories, livestock breeding complexes, alcohol and other spheres of industry.
«Plant Melmash» CJSC extensively cooperates with Russia, Kazakhstan, the Republic of Belarus, Uzbekistan, Azerbaijan and other countries of the near abroad.
Long-term experience of conveyor equipment development, technical and material base allow to produce equipment with good technical and economic indices of high quality, keep competitive prices and also manufacture non-standard equipment according to the customer's individual applications.

«METALLOKONSTRUKTSIYA» LLC

«Metallokonstruktsiya» LLC has been working for more than 20 years and it is one of the largest participants of the rolled stock market of Kurgan and Kurgan region.

The company specializes in the following spheres of activity:

- sale of rolled stock;
- primary processing of metal: cutting of metal on a disc-shaped machine, plasma arc cutting, list cutting by test strip cutters, gas-cutting of metal;
- services for manufacture of products from metal;
- supply, loading unloading of rolled stock;
- distribution of construction materials, polyethylene pipes, cellular polycarbonate, thermal insulation.

There are three indoor storages with rolled stock and construction materials, storage of hardware, outside storage with rolled stock, shops of list rolled stock cutting, own shop for manufacture of products from metal and also two frame cranes, carrying out loading and uploading of rolled stock and construction materials on the company territory.

«Metallokonstruktsiya» LLC has its own car fleet, allowing effectively and timely supply products to the storage and clients.

«PRODUCTION ASSOCIATION OF HIGHLY ACCURATE ALLOYS AND FOUNDRY ALLOYS» LLC

«Production association of highly accurate alloys and foundry alloys» was founded in 2003 and it specializes in manufacture of highly accurate alloys and foundry alloys from non-ferrous metals of different chemical composition, physical state and sizes.

Main types of manufactured products are:

- drawn rods;
- round strand;
- casting and foundry alloys.

Manufactured products are used in different spheres of industry: electro-technical, metallurgical, energy production, mechanical engineering, shipbuilding, chemical and oil processing industry, instrument manufacture and also in aircraft industry.

Technological process includes:

- melting and foundry production, equipped with specialized high frequency vacuum foundry equipment for casting of high frequency alloys and foundry alloys;
- rolling production department, equipped with universal hot rolling mill;
- drawing production department, equipped with equipment for drawing and wire annealing;
- own laboratory centre, equipped with modern equipment, providing full control of manufactured products quality.

«INDUSTRIAL AND COMMERCIAL ENTERPRISE «TEHNOSTAL» LLC

«Industrial and commercial enterprise «TehnoStal» LLC performs its activity for manufacture of spare and component parts of industrial equipment.

Output products:

- spare and component parts for cement factories;
- spare parts for drilling pumps;
- spare parts for mining equipment;
- spare parts for size reduction equipment;
- component parts of technological equipment for mechanical-engineering and metallurgic plants (non-standard, test and etc.);
- spare parts for heat-treatment machinery;
- metal constructions;
- screw piles with cast tag.

At present the company has an opportunity to offer castings from carbon, alloyed, highly-alloyed and heat-resistant steels; gray, abrasion-resistant, chrome cast irons; bronze materials, brasses, aluminium, according to available range performed according to the customer's drawings with further mechanical processing.

Clients of «TehnoStal» industrial and commercial enterprise are mechanical-engineering plants of oil and gas extraction complex, enterprises of energetic sphere, cement plants and also building organizations.

«PROTON» LLC

«Proton» LLC deals with manufacture and integrated supplies of pipeline valves.
The company performs supplies to enterprises for extraction and processing of oil and gas, housing and utilities sector and building and constructions departments.
Manufactured products:

- shut-off valves;
- reverse valves;
- closers;
- ball valves;
- valves for technological lines;
- component parts.

Technical characteristics of «Proton» LLC products:

- working environment: oil, gas, gas condensate, water, steam, explosive and non-aggressive to materials of parts substances;
- materials of manufacture: stainless steel from different brands;
- operating temperature: from -40° to +200°C;
- maximum operating pressure: up to 70 MPA;
- service life of parts without replacement of component parts: 30 years.

At present range of the company is more than 8000 names of products from which more than 3000 names are at stock and in availability.
Manufactured by «Proton» LLC products are certified.

«ENTERPRISE «SENSOR» LLC

«Enterprise «Sensor» LLC is a big specialized enterprise for manufacture of flanged fittings, flanges, pipeline valves, oil and gas equipment.
The Company has great scientific and technological potential. There are doctors and candidates of sciences, highly-qualified managers, designers, manufacturing engineers, programmers and workers among 200 employees working on the enterprise. High technological training of employees allow to develop and quickly adopt new competitive products.
«Sensor» Enterprise is equipped with modern metal-working equipment.
Plant laboratory is equipped with modern tools for measurement and control for incoming inspection of rolled metal products, multiple inspections of technological processes and detection of the output products quality.
Warranted periods of products supply are provided with constant stock reserves – more than 1000 tonnes of calibrated rolled metal products from 25 grades of steel and flanges forms. All work of personnel, beginning from application receipt to shipping of ready products is performed in compliance with international standards requirements of ISO quality system.

«TEMPER RUS» LLC

«TEMPER RUS» LLC is Russian plant for manufacture of steel ball valves of the «TEMPER» brand.

About the plant:

- full cycle of serial valves manufacture since 2014;
- territory of the plant is more than 2,7 hectares;
- production areas - 4000 m²;
- the machine park has more than 130 units of equipment;
- number of employees - 120 people.

About the products:

- ball valves DN 15-500, PN 16-40 in reduced and full-bore versions, t0 -40 -60 +2000C for liquid and gaseous mediums, separate line of gas valves for gas distribution nets;
- connections: welded, flanged, threaded, choke-nipple and their various combinations;
- series of regulated (balancing) valves DN 15-200;
- valves for underground trenchless laying with stem height up to 3000 mm;
- valves from steel 20, cold-resistant seamless thick-walled steel, stainless steel;
- manufacture of non-standard items upon customer's specifications.

Advantages of the company:

- quality management system ISO has been integrated and it is successfully applied on the enterprise;
- supplies of the products into 19 countries;
- the plant has received certificates CE, EHP and EN488-2015;
- designed capacity of the plant is not less than 40 000 valves per month;
- 3 years warranty for the products.

«WORLD PRODUCT» LLC

«World Product» LLC is a producer of ivan-chai (willow herb), an alternative to regular tea.

In science terms, ivan-chai is called willow herb. It is a tall herb that blooms with purple flowers in summer. Willow herb contains large amounts of plant fibers (cellulose), organic acids, lectins, sugars, pectin. It contains 5-6 times more vitamin C (from 90 to 588 mg per 100 grams of raw grass) than lemons.

Among the trace elements that the plant contains, there is a high concentration of iron, copper, and manganese.

Willow herb helps to:

- remove toxic substances from the body;
- normalize metabolic processes;
- reduce the cholesterol level;
- improve laxation;
- reduce the risk of cancer;
- normalize the blood pressure;
- prevent atherosclerosis;
- boost the immune system.

The World Product company carries out strict control at every stage of production, starting with the collection of leaves and ending with the packaging of the final product, which allows saving the health benefits and eating experience of the products sold.

«DARGOROD» LLC

Dargorod workshop («Dargorod» LLC) was founded in 2020. Its activity is aimed at the promotion abroad of the original Russian craft: birchbark craft.
Using technologies as close to the original as possible, while using modern materials and equipment, the workshop produces utensil from natural birchbark. Due to the unique natural properties of the material and solicitous attitude to it, with processing that excludes fuming, varnishing, and coloration, the workshop manages to achieve the maximum environmental friendliness of the final product.
The product range includes more than 40 items: cutlery, utensil, caskets, baskets, etc.
Products of the Dargorod workshop are in demand in Europe and the USA, maintaining interest in the Russian ethnic culture and forming a favorable image of our country among buyers due to the quality and natural beauty of birchbark products as the original symbol of Russia.
